hand.

"No genius can offerd to neglect the patient labors of the world's great thinkers and strike out for himself. Mr. Edison. like many another great man, has not recognized his limitations. The greatest mortals are finite, very finite. None of us knows every thing. But I said there are philosophic proofs for the spiritual nature of the soul and its survival after death."

Cardinal Gibbons advised the reading of Maher's "Psychology" for evidence of such philosophic proofs and urged the convictions of thousands teligious teachers as to the reliability of the New Toslament record concerning Christ's resurrection as proofs
